

Children's Hospital Boston

Setting Coalition Objectives and Priorities

Goals and objectives

- CHIPRA Project Team framed a “strawperson” set of goals as part of the CHIPRA Grant process derived from CHIPRA Grant materials description of the role and functions of the Coalition
- Coalition will support the implementation and dissemination of the CHIPRA grant components in the areas of quality measurement and provider-based models of care
- Coalition will also address the issue of sustainability, and determine in what other areas it wishes to work.
- The Coalition will be supported in that work through the opportunity made available under the CHIPRA grant.

Goals and objectives (cont.)

- ▶ **Develop a 5 year statewide quality roadmap for improving health care services and care outcomes for children in Massachusetts**
- ▶ **Advocate for inclusion of child health issues in broader statewide activities**
- ▶ **Provide direction on the development of new measures to evaluate and track progress related to children's health care**
- ▶ **Create synergies among existing child health measurement and improvement activities to increase impact**
- ▶ **Develop and implement plans to ensure the Coalition's long term sustainability**

Proposed criteria for setting Coalition priorities

- ▶ **Where do the data drive us?**
 - To what areas of focus do the data point?
- ▶ **Where are the gaps in data?**
 - For what areas do we need additional data to identify the priority areas?
- ▶ **What are the leverage points?**
 - What areas present opportunities to leverage ongoing activities in other arenas?
 - What activities are 'implementable' in the short term? In the long term?

Proposed criteria (cont.)

- ▶ **Where can we most effectively create synergies?**
 - With what ongoing work can we engage?
- ▶ **Where can we achieve broad engagement?**
 - Which areas will generate broad support from stakeholders?
